PROFILE

Frontend developer with 2+ years of experience building responsive, accessible web interfaces in React, Next.js and TypeScript. Has worked as the sole frontend developer on production web apps, owning architecture and delivery from design handoff to deployment. Experienced with PWAs, REST API integration and responsive design, and comfortable picking up unfamiliar codebases quickly.

EXPERIENCE

Lead Frontend Website Developer (Sole Frontend Developer), Proxynet Communications *Jan 2026 – Oct 2026*

Lagos, Nigeria

- Owned all frontend architecture and delivery as the only frontend developer, building scalable, mobile-first web applications in React with cross-browser compatibility.
- Built and deployed Progressive Web Apps (PWAs) and Single Page Applications (SPAs), improving user engagement and offline accessibility.
- Managed global state with the React Context API using separate Auth, Cart, Wishlist and Quote Form providers, so pages like Checkout could read the signed-in user and cart without prop drilling.
- Optimised application performance and asset delivery, reducing load times and improving the experience across devices.
- Introduced debugging practices and component testing standards that reduced production issues and made releases more stable.
- Worked closely with UI/UX designers to turn wireframes and high-fidelity mockups into clean, maintainable, pixel-perfect semantic HTML, CSS and JavaScript.

Lead Frontend Developer (Sole Frontend Developer), Dear Henrietta *Oct 2025 – Nov 2025*

Lagos, Nigeria (Remote)

- Onboarded quickly onto an unfamiliar Next.js and Tailwind CSS codebase and delivered new modules for the admin dashboard.
- Shipped 5+ admin interface updates every week in Next.js and Tailwind CSS.
- Built and integrated APIs and location-tracking features for reliable system communication and data handling.
- Used browser developer tools and AI-assisted debugging to master the new stack and speed up feature delivery.

Frontend Developer (Intern), Cognifyz Technologies *Jan 2025 – Feb 2025*

India (Remote)

- Built responsive, user-friendly web interfaces with HTML, CSS, JavaScript and Bulma.
- Gained hands-on experience with modern frontend tools and frameworks through project work and mentorship.

Frontend Developer (Intern), Integrated Software Services Limited *Jan 2024 – Jun 2024*

Lagos, Nigeria

- Developed responsive, user-friendly web interfaces with React, HTML, CSS and JavaScript.
- Worked with cross-functional teammates to deliver projects on time and in line with client expectations.
- Gained hands-on experience with team-based coding workflows and modern frontend development practices.

PROJECTS

Live projects and case studies are on my portfolio: amaugo-faith.vercel.app

EDUCATION

B.Sc. Computer Science, Babcock University, Ogun State, Nigeria *Graduated July 2025*

SKILLS

Core stack: JavaScript (ES6+), TypeScript, React.js, Next.js, React Context API, HTML5, CSS3, Tailwind CSS

Practices: Responsive web design, Agile/Scrum, cross-browser compatibility, RESTful API integration, unit and component testing (Vitest), performance optimisation (Core Web Vitals), web accessibility

Tools: Git, GitHub, Vite, Webpack, browser developer tools, Vercel (Git-based continuous deployment)

Strengths: Adaptability, fast problem-solving, team collaboration, communication, attention to detail, time and task management
